Professional Manufacturer of Engine Cylinder Head Gaskets and Gasket Sets

Profile

Ing Tien Enterprise Co., Ltd established in 1988, is a renowned manufacturer of gasoline/ mainly on the global aftermarket sales. All of our quality products are developed in-house, gasket kits. All of them are globally marketed under ITE own-brand.

Having several decades of professional manufacturing experience, our company is also the quality has been highly recognized by international auto parts manufacturers and global and making automotive engine gaskets by utilizing extremely critical production flow

In addition, through years of dedication and perseverance by all our employees, we have Our firm integrates our specialized techniques in the designing and tooling of molds/dies

Ing Tien's goal is to provide high product quality and consistent service for customers. We With good after-sales service, modern management and professional sales and marketing manufacturer.

We continuously invest in the research and development of new techniques in order to keep quality, price and produce range.

ITE

diesel engine gaskets and overhaul kits for all major car brands. Our company focuses
Our company's major products include engine cylinder head gaskets and engine overhaul

most recognized designer and developer of dies/molds. Our company's excellence in
trade partners. Since its inception, our company has been concentrating on developing
management and quality control.

been able to adopt the latest and most advanced production techniques and equipment.
with the new concepts of standardized production.

do it throughout the entire process from designing, tooling, producing to the final products.
policy, Ing Tien has become a highly regarded and trusted automotive gasket

up with the latest technology trend so as to create international competitiveness through

World Marketing & Sales Territory

ITE gaskets have been proactive participating international trade shows and enthusiastically accepted by the market, thanks to its product quality and sales policy. Up to now, we have managed to appoint exclusive importers in the world-wide market. We believe in business growth through sincere relationship and teamwork. Cooperating closely with importers or distributors, we will design good sales and marketing strategy for each market.

History

1970 Professional designing and manufacturing of steel molds for engine overhaul sets.

1988 Formal establishment of ING-TIEN Enterprise, specializes in the design & manufacture of steel molds.

1992 Expand into cylinder head / intake / exhaust gaskets product line, using mainly stainless steel.

- 1996**
- Incorporated ING TIEN Enterprise Co.,Ltd. replaced every outdated production machine and introduced the most advanced equipment, such as 25-250 ton compressed air injectors and 500 ton hydraulic machine, etc.
 - Transformed the design, development, production, finishing and packaging of engine gasket mold into a streamlined process flow.

2001 Continued to expand production lines and packaging works for all types of engine overhaul sets.

2002 Full adoption of a 3D Computer Aided Design and Computer Aided Manufacturing program.

2003 Implemented a computerized ERP process flow to fully computerize purchasing, production, manufacturing and warehouse management, and established a congruous service system.

- 2004**
- Buy a new factory, map out the direction of the production lines.
 - Expand the production capability.
 - Accelerate to develop the new models, leading for the other competitors.

2005 Relocated to the present location as part of expansion.

2006 Certificated with ISO9001:2000.

2008 Production processes and development for HR-180 FKM Rubber Coated Steel.

2009 Development of Laser spot welding process.

2010 Development of HR369 (NBR) Rubber Coated Steel.

Renew Engines

- 2011** • Production lines for applying rubber coating on steel were introduced.
- Air purifier with wet scrubber and activated carbon absorption towers were installed to improve air environment.
- Oil removal equipment was installed to ensure stability of coating.

- 2012** • Updated to the latest version of ISO 9001:2008 certificate.
- Implemented the latest ERP management software.
- Development of environmental protection paint processes.
- Rubber coated materials matched an environmental protection standard, have the EU environmental protection certification.

- 2013** • Development of laser making process.
- Development of hardness tester process to ensure the quality and durability of the raw materials.

2015 • HR369(NBR) Rubber Coated Steel passed the test of Halogen free by SGS organization in September, 2015.

2016 Molybdenum disulfide and Rubber coated materials passed the test of REACH-SVHC standard.

- 2017** • Certificated with ISO9001:2015
- Introduced the automatic dispensing processes to improve sealing functions and efficiency.
- Molybdenum disulfide/HR369(NBR)/HR180(FKM) matched 181 REACH rules by SGS organization (MoS2/HR-369/HR-180)

2018 • Liquid rubber (FKM & NBR) and solid rubber molding process were introduced.

- 2019** • Introduction of contour measuring machine for the inspection of bead shape and comparison of pitch difference of the products.
- Introduced packaging machine to enhance protection on angular gaskets.
- Development of FKM (red) coating completed.

HR RUBBER COATED MATERIAL

This coating is manufactured based on INGTIEN's exclusive HR rubber coated material technology through years of intensive research and is ideal for applications requiring high-temperature resistance sealing conditions. Cylinder head gaskets and exhaust manifold gaskets with this coating are used in high-performance engines in automotive racing, off-road vehicles as well as motorcycles.

• IMPROVED TEMPERATURE RESISTANCE :

1. HR180: The material is the same as FKM. The heat resistance is up to 250°C (Below is the SGS test report)
2. HR369: The material is same as NBR. The heat resistance can be 150°C ~180°C

• CUSTOMIZABLE RUBBER THICKNESS :

HR rubber coated material thickness can be customized based on your specific requirements. We can provide coating thickness from 0.025mm to 0.1mm.

• METAL OPTIONS :

Available in stainless steel, SPCC(Steel - Plate - ColdRolled Coil) and aluminum.

• IMPROVED SEALING :

HR rubber coated material has excellent flange conformability to surface irregularities which allows it to effectively seal uneven and stamp surfaces while minimizing flange finishing requirements.
